ROAD MAINTENANCE

Poly and Wire Brush

Right Angle

Left Angle

HOWARD's Road sweeper HTS 180 is a PTO driven brush for rear tractor-mounting. It can be angled left and right, and comes with dust flap and parking leg as standard features.

Designed for easy service and maintenance with spareparts readily available.

Power is transmitted via universal driveshaft through an oil bath gearbox, transmission shaft and chain and sprocket side drive.

Height is easily adjusted via two swivel castor wheels.

Easy changeable polypropylene circular bristle discs (41). Mixture of alternating Wire/PP bristles available as optional.
