

The most versatile slasher for general grass and weed control, HS 24 is designed for the medium duty tractor range. Suitable for grass cutting on a continuous basis, thus providing a very short pay-back time for professional contracting jobs.

Blades designed to lift grass prior to cutting.
Stepless height adjustment.

A6 Universal Driveshaft with shear bolt protection.
Off-settable to the left or right of tractor wheels.

Cutting of grass with a cylinder/bedknife (reel mower) leaves a neater finish and is recommended on fine turf areas such as golf course greens. But if speed and economic considerations prevail, rotaslasher is superior. Moreover, slashed clippings are thoroughly smashed; decompose faster - adding nutrients to the soil, and should, as a general rule, therefore not be removed.

Specification	Working width (cm)	Cutting height (cm)	For tractor (hp)	With Rollers	Weight Kg.
Rotaslasher HS 24/120	120	1-9	25-45	no	240
Rotaslasher HSR 24/120	120	1-9	25-45	yes	280
Rotaslasher HS 24/150	150	1-9	35-55	no	290
Rotaslasher HSR 24/150	150	1-9	35-55	yes	340
