

SWEeper COLLECTOR HSW

HOWARD's Grass Sweeper HSW collects grass clippings, leaves, twigs etc. into a steel hopper, which can be neatly emptied from the tractor seat. Also suitable for picking up tin cans, polystyrene food-boxes, plastic bags and other litter.

Labour saving alternative to raking and sweeping of : Golf Courses, Parks, Sportfields and Fairgrounds.

Four rows of easily changeable polybrush combs are fitted horizontally onto a rotor shaft. Wide profile rear turf tyres - and pneumatic front castor wheels which also serve as height adjusters. Designed for sweeping and collecting light debris off uneven terrain - primarily turf, but works equally well on hard surfaces such as running tracks, dirtroads and parking lots, where, however, more bristle wear must be anticipated.

For cement or tarmac surfaces it is recommended to use HOWARD's circular bristle Road-sweeper HTS 180 (Refer to Road maintenance brochure).

Specification	Sweeper Collector	
	HSW 120	HSW 180
Working width, cm	120	180
Tractor Hp. min	25	35
Hopper capacity	1.2M ³	1.8M ³
Weight, kg.	410	490
